Acknowledgement of Country

Train IT Medical acknowledge the traditional owners and custodians of land and waterways we meet on today.

We wish to pay our respects to Aboriginal and Torres Strait Islander elders past, present and future.

Further learning:

The image shows the cover of a RACGP guide. At the top left is the RACGP logo with the text 'RACGP | Royal Australian College of General Practitioners'. To the right of the logo is the title 'Guide to providing telephone and video consultations in general practice'. Below the title is a photograph of a male doctor with a stethoscope and a female patient looking at a laptop. At the bottom left is the website 'racgp.org.au' and at the bottom right is the slogan 'Healthy Profession. Healthy Australia.'

[RACGP: Telehealth video consultation guide](https://www.racgp.org.au/telehealth)

The image shows a woman in a blue shirt and patterned jacket gesturing while speaking. To her right is the text 'We share because we care'. Below this is a paragraph about sharing resources. Further down is a section titled 'Coronavirus / COVID-19' with two buttons: 'FREE COVID-19 RESOURCES' and 'COVID-19 NEWS & INFO'.

We share because we care

Over our years of presenting, training & consulting to medical practices, we have collated thousands of learning resources.

And now we want to share them with you – for **FREE**.

Our resources includes useful links, news articles, helpful documents, checklists, and much more.

WENTWEST – COVID19

See more...

Attending your appointment via a Video Call

Replace this text with the name of your service.

Where appropriate, you can have your consultation online via a video call

Video calling is as convenient as a phone call, with the added value of face-to-face communication.

It can save you time and money, and brings your care closer to home.

Where do I go to attend my appointment?

To attend your appointment, go to:
Replace this text with the URL of your service's Waiting Area entry page

Instead of travelling to your appointment, you enter the clinic's waiting area online.

The health service is notified when you arrive, and your clinician will join you when ready.

There is no need to create an account. No information you enter is stored.

What do I need to make a video call?

- ✓ A good connection to the internet
If you can watch a video online (e.g. YouTube) you can make a video call
- ✓ A private, well-lit area where you will not be disturbed during the consultation
- ✓ One of these:
 - Google Chrome web browser (recommended) or Firefox web browser on a desktop or laptop (Windows or MacOS), or on an Android tablet or smartphone

Is it secure?

Video calls are secure; your privacy is protected. You have your own private video room, that only authorised clinicians can enter.

How much does a video call cost?

The video call is free (except for your internet usage). However, the regular costs – if any – of a medical consultation still apply.

How much internet data will I use?

You don't use any data while waiting for a clinician to join you.

A video consultation uses less than half of the data you would use while watching a YouTube video in High Definition*.

Data use is less on lower-speed internet connections, or if you're using a less powerful computer, tablet, or smartphone. These factors can also reduce the overall quality of the call.

Data use increases when there are more than two participants in the call.

Smartphone & tablet users

If you can, connect to a home or work

Patient Information Leaflet

Where do I go to attend my appointment?

To attend your appointment, go to:

Replace this text with the URL of your service's Waiting Area entry page

support@wentwest.com.au

ph 8811 7117

Learning Objectives:

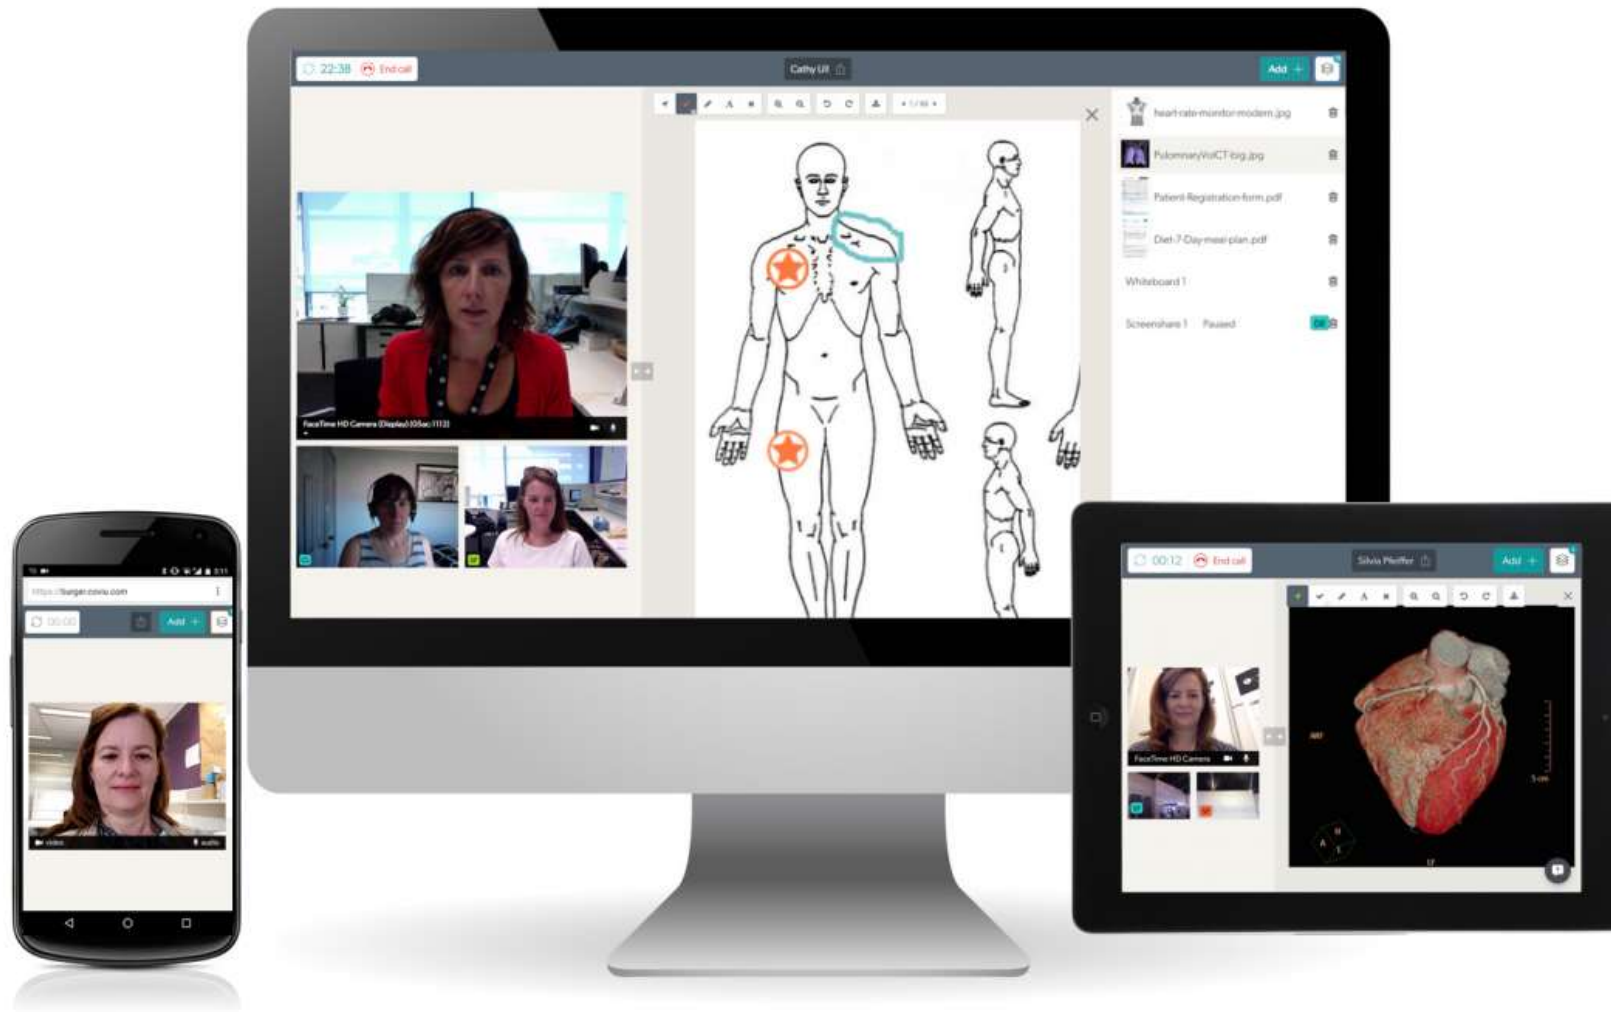

1. Define team-based care and telehealth
2. Discuss changes to Medicare item numbers in relation to team-based care
3. Use case conferencing to interact efficiently with other clinicians in a team-based care setting.
4. Consider digital health tools (including My Health Record) to enhance care for vulnerable patients and meet eligibility for practice incentive payments

Learning Objective 1:

Define team based care and telehealth

Team based, patient-centred care and shared goals

Coviu

*“**Team-based care** has the potential to improve the comprehensiveness, coordination, efficiency, effectiveness, and value of care, as well as the satisfaction of patients and providers. “*

*“It is **patient-centred** and supports patients in learning to manage, organize, and participate in their own care at the level the patient chooses.”*

Learning Objective 2:

Discuss changes to Medicare item numbers in relation to team-based care

New COVID-19 Bulk Billing Incentives - April 2020

Bulk Billing Incentives*		
Item	Temporary Fee (30 March – 30 September 2020)	Temporary Benefit (30 March – 30 September 2020)
10990	\$15.00	\$12.75
10991	\$22.70	\$19.30
10992	\$22.70	\$19.30
64990	\$14.10	\$12.00
64991	\$21.30	\$18.15
74990	\$14.10	\$12.00
74991	\$21.30	\$18.15
New Item	Temporary Fee (14 April – 30 September 2020)	Temporary Benefit (14 April – 30 September 2020)
10981	\$15.00	\$12.75
10982	\$22.70	\$19.30

This is for vulnerable patients who are not eligible for 10990 or 10991.

Apply for unREFERRED medical service for patients more vulnerable to COVID-19 - not admitted to a hospital.

Bulk bill patients 'more vulnerable to COVID-19'

Must
bulk-bill

Vulnerable means a patient at risk of COVID-19, so a person who:

- is required to self-isolate or self-quarantine in accordance with guidance issued by the Australian Health Protection Principal Committee in relation to COVID-19; or
- is at least 70 years old; or
- if the person identifies as being of Aboriginal or Torres Strait Islander descent—is at least 50 years old; or
- is pregnant; or
- is the parent of a child aged under 12 months; or
- is being treated for a chronic health condition; or
- is immune compromised; or
- meets the current national triage protocol criteria for suspected COVID-19 infection.

The services will be available until 30 September 2020. The continuing availability of these items will be reviewed prior to 30 September 2020.

Frequently asked questions

COVID-19 Bulk-billing incentives Frequently Asked Questions

Last updated: 8 May 2020

- Commencing 13 March 2020, new temporary MBS telehealth items have been made available to help reduce the risk of community transmission of COVID-19 and provide protection for patients and health care providers.
- A service may only be provided by telehealth where it is safe and clinically appropriate to do so.
- It is a legislative requirement that the new GPs and Other Medical Practitioner (OMP) telehealth services, must be bulk billed for Commonwealth concession card holders, children under 16 years old and patients who are more vulnerable to COVID-19.
- The bulk billing incentive Medicare fees have doubled (until 30 September) for items relating to GP and OMP services, diagnostic imaging services (items 64990 and 64991) and pathology services (items 74990 and 74990). These items can be claimed with the new temporary MBS telehealth items where appropriate.
- As of 20 April 2020, two new bulk-billing incentive items have been introduced for services provided to patients who are more vulnerable to COVID-19.

[FAQs](#)

MBS Item Number for COVID-19 Telehealth now include:

- Care planning
- Indigenous Health Assessments
- Eating Disorder Management
- Mental Health
- Urgent After Hours
- Pregnancy Support

WHAT'S YOUR PLAN?

Generate list of vulnerable patients:

- At risk > flu vaccinations
- already on care plans?
- due for care plan review
- everyone over 65
- Aboriginal and/or Torres Strait Islander origin
- Pregnant patients
- Babies under 12 months

Practice Incentive Payments

- ✓ Double PIP QI payments for GP practices open for face to face services for minimum 4 hours per day
- ✓ \$10 per SWPE
- ✓ Quarterly payment cap now \$25,000 per quarter
- ✓ Payments will be made on 1 May and 1 August

[Read more about PIP QI changes](#)

PIP QI

Practices may focus their quality improvement activities on areas which are informed by their clinical information system data and meets the needs of their practice population.

PDSA/Quality Improvement Activity - Sample

Topic – My Health Record

Area of Focus: Shared Health Summaries

Step 1. The 3 Fundamental Questions

1. What are we trying to accomplish?

(By answering this question you will develop your goal for improvement)

Improve the management of vulnerable patients through the use of digital health and in particular the use of My Health Record (as a method to share information) with a focus on vulnerable patients.

2. How will we know that a change is an improvement?

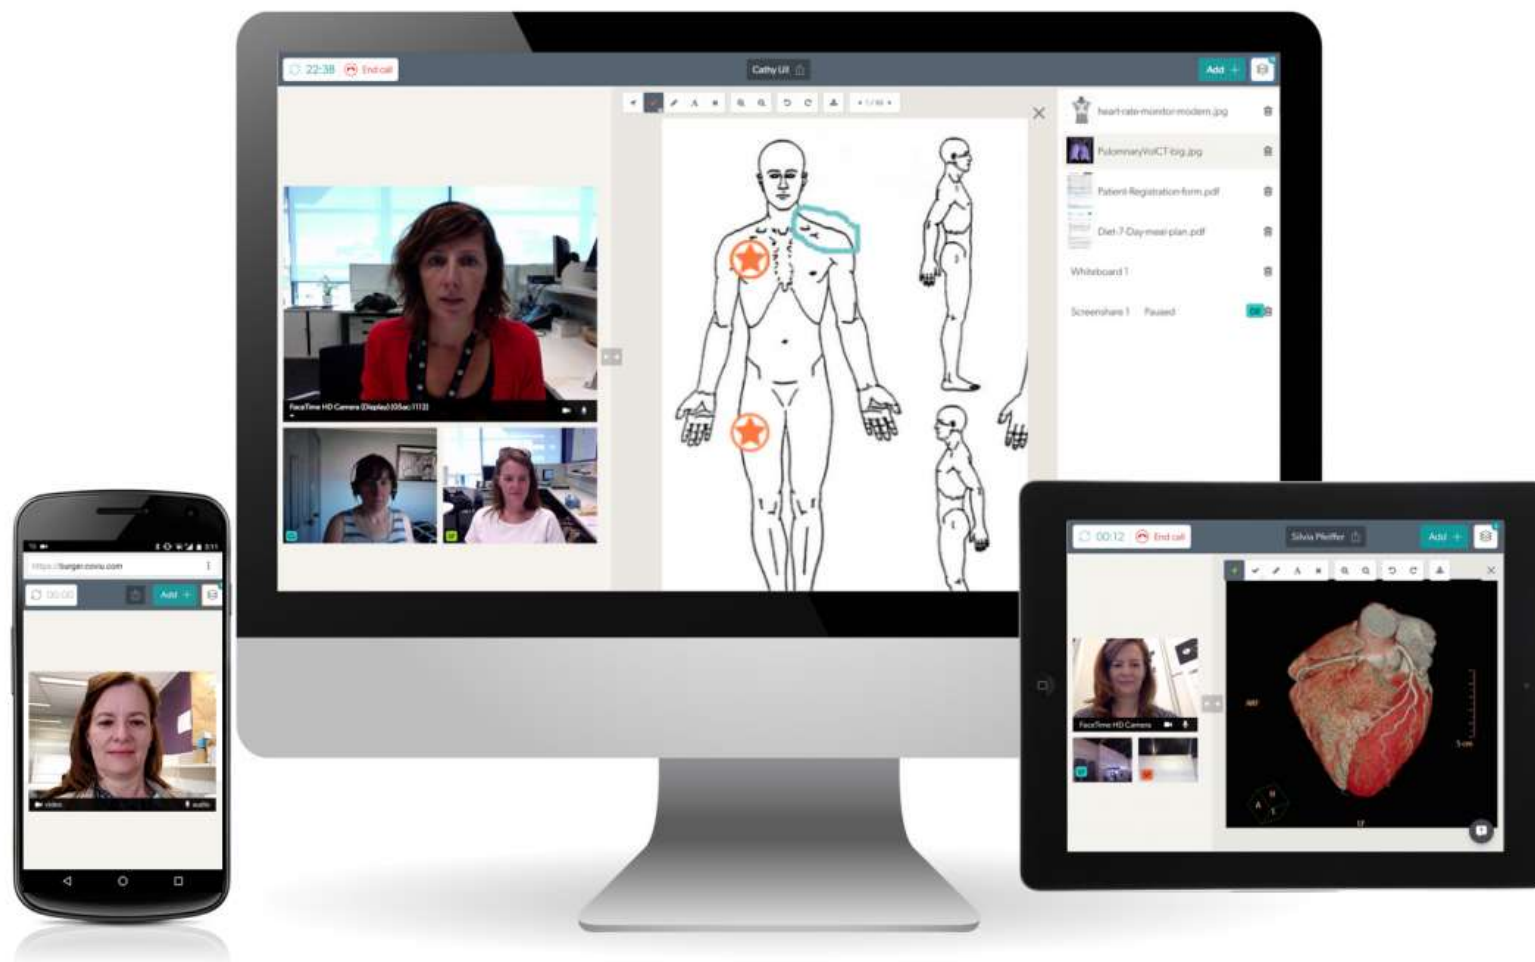

(By answering this question you will develop measures to track the achievement of your goal)

The total number of Shared Health Summaries for 'vulnerable patients' uploaded to My health Record will increase by 10% each month for the next 6 months.

Learning Objective 3:

Use case conferencing to interact efficiently with other clinicians in a team-based care setting.

<https://www.coviu.com/>

HOW TO DO A HIGH QUALITY REMOTE CONSULTATION¹

1. BEFORE THE CONSULTATION

- Confirm that a remote consultation is clinically appropriate for this patient, at this time.
- Plan to use a private, well-lit room and ask the patient to do the same, do not sit in front of a bright window (draw curtains).
- For video decide on the platform to be used e.g. Healthdirect, Skype, Zoom, Facetime, WhatsApp etc.
- Take the patient's phone number and provide the patient with information on video or phone consults.
- Inform the patient of any additional charges for a remote consult.
- Know how you will access the patient's notes before, during and after the consult.
- Have your equipment in place and tested – ideally dual screen and a speed test.
- Have your plan B in place such as rescheduling, using the phone or if the patient is seriously ill.
- On the day check the technology is working.
- Contact (call, SMS) the patient an hour before the consult to confirm it's still appropriate to wait until the appointment time.

2. STARTING THE CONSULTATION

- Initiate the consultation by connecting online or calling the patient.
- Say something e.g. "can you hear/see me?" use the chat or phone to troubleshoot with the patient and position screens so you can both be seen clearly.
- Revert to your plan B if the technology isn't working.
- Confirm the identity of the patient and anyone else on the call with either you or the patient or that they are alone.
- Take and record verbal consent for the video or phone consult.
- Explain what can or cannot be done on a remote consult.

3. DURING THE CONSULTATION

- Remind the patient what the plan B is should the technology fail and they are not to record the consultation or put health information in the chat.
- Provide instructions on how to capture visual information – come close to the camera or take a photo.
- Let the patient know when you are taking notes or reading something – silence is OK.
- Ensure adequate clinical notes are in the patient medical record.
- Be aware that remote consults are new for patients and communication may be harder for you and them.

4. FINISHING THE CONSULTATION

- Summarise key points and what happens next – who will do what & when.
- Ask the patient if they need anything clarified.
- Confirm and record if the patient is happy to have a remote consult again.
- Tell the patient you are going to close the call.
- Send a patient evaluation form to get their feedback on having a remote consultation.

¹A remote consultation is one where the Doctor and Patient are not in the same room. This could be by phone or video.

TELEHEALTH SCENARIOS

RESPONSIVE
OR PLANNED

PATIENT + NURSE + GP

1. Booked nurse + client care plan appointment
2. Nurse calls GP into join telehealth consultation.

PATIENT + GP + SPECIALIST

1. Times co-ordinated, appointment booked and link sent to all parties.
2. At time of appointment all parties enter telehealth waiting room.

PATIENT + GP/NURSE + INTERPRETER

- Nurse can quickly send a direct link to join the consultation.

PATIENT/CLIENT + AHP + FAMILY

1. AHP books appointment and sends the link.
2. Family member can also receive link or be added urgently during consult.

Team care with shared goals

Learning Objective 4:

Consider digital health tools (including My Health Record) to enhance care for vulnerable patients and meet eligibility for practice incentive payments

MedicalDirector Telehealth

- Telehealth capability has launched in MedicalDirector Helix and Clinical. In Helix, it is accessible within the Clinical Consult panel. In Clinical, it is accessible via the Sidebar
- No need for any special downloads. A secure link can be sent to the patient as part of the normal email and SMS confirmation process, and the patient can join the consultation at the appropriate time, via phone, tablet or computer
- Telehealth capability will be free within MedicalDirector for at least the next 3 months, to support practices during COVID-19 (conditions apply)
- Emails have been sent to all MedicalDirector practices with instructions on setting up

PDSA Template

Please complete this template for each PDSA cycle you undertake.

Idea #1	<i>Describe the idea you are testing: refer to the 3rd fundamental question, 'What are we trying to accomplish?'</i>
	<ul style="list-style-type: none">• Hold a team meeting• Agree definition of Vulnerable patients and how to flag in software• Agree a plan of action to follow up and upload SHS

*Evidence has shown that
quality improvement activities
lead to positive change
in practices, particularly when a
whole practice team approach is
adopted*

Genie to roll out end-to-end telehealth platform with online booking and payments

Written by Kate McDonald on 20 April 2020.

Clinical software vendor Genie Solutions will this week roll out the first iteration of its new telehealth solution TeleConsult, powered by Amazon Chime, one of four products on its new platform that aims to provide an end-to-end telehealth workflow solution for medical specialists.

The company is also set to release a **booking system with triage capabilities** it has been developing with online appointments specialist HotDoc, along with a new online payment system it has developed with Ezidebit and an online patient registration service that lets new patients register their demographic details.
